Sahith M

Artificial Intelligence & Data Science | Chennai, Tamil Nadu
sahithm2006@gmail.com | linkedin.com/in/sahith-m-sahith518 | github.com/SahithM2006

EDUCATION

Saveetha Engineering College (Autonomous) 2024 -- 2028

B.Tech in Artificial Intelligence and Data Science | **3rd Year | CGPA: 7.5 / 10**

Class XII | 80% **Class X** | 85%

TECHNICAL SKILLS

Languages: Python, C, SQL

AI & Data: Machine Learning, Deep Learning, Data Analysis, EDA, Feature Engineering

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV

Backend & Development: FastAPI, REST APIs, PostgreSQL, Docker

Tools: Jupyter Notebook, Google Colab, Git, GitHub

Domains: Computer Vision, Generative AI, IoT, Cybersecurity

HACKATHON & TECHNICAL PROJECTS

AEGIS-TWIN -- Autonomous Digital Twin for Adversarial Path Simulation | Cybersecurity | Digital Twin | Hackathon

• Designed a cybersecurity-focused digital twin for modelling enterprise assets and simulating adversarial attack paths.

• Developed workflows to identify potential lateral-movement routes and support defensive decision-making.

• Architected and prototyped the solution as part of a national-level hackathon.

HealthBridge AI -- Healthcare Data Interoperability Platform | Healthcare AI | Data Interoperability | Prototype

• Developed a prototype interoperability platform for transforming and validating heterogeneous clinical data.

• Applied FHIR-aligned structures and structured validation to support standardized healthcare data exchange.

• Designed AI-assisted processing workflows to improve interoperability between healthcare systems.

Probe360 -- Agentless Vulnerability Assessment Platform | Cybersecurity | Vulnerability Assessment | Hackathon

• Designed an agentless security platform for asset discovery, network-based vulnerability assessment, and centralized risk intelligence.

• Proposed continuous monitoring and AI-assisted deception capabilities to improve enterprise security visibility.

• Developed the solution architecture and prototype workflow as a hackathon project.

VisionTraffic AI -- Intelligent Traffic Monitoring & Analytics | Computer Vision | Machine Learning | Traffic Analytics

• Developed a computer-vision based traffic monitoring prototype for vehicle detection and traffic analysis.

• Integrated concepts for vehicle counting, emergency-vehicle identification, accident detection, and traffic-density analysis.

• Designed the solution to support data-driven traffic monitoring and management.

AI Carbon Intelligence Platform -- Sustainable Supply Chain | Artificial Intelligence | Data Analysis | Sustainability

• Designed an AI-driven decision-support platform for analysing carbon emissions across supply-chain operations.

• Proposed data-driven identification of emission hotspots and sustainability insights.

• Developed the solution concept as a hackathon-focused project for sustainable decision-making.

ACHIEVEMENTS

• Won 3rd Prize in the Software Category at a National-Level Hackathon.

• Shortlisted among the Top 15 teams in a competitive hackathon.

• Participated in National-Level Hackathons and developed AI/software prototypes under time constraints.
